"I started using Arapal™ Medical Thermo Pad and Hand Unit for recovery and injury prevention. In fact I am so attached to my Thermo Pad I travel everywhere with it "

Testimonial from Hayden Godfrey

I have been a professional cyclist for several years and do a tremendous amount of training and travel to fulfill this unique lifestyle. This sometimes puts tremendous stress on the body and means looking after it is top priority. I started using Arapal™ Medical Thermo Pad and Hand Unit for recovery and injury prevention.

It's like having a personal massage therapist with me all the time but unlike massage I don't get that sluggish feeling you sometimes get the next day.

In fact I am so attached to my Thermo Pad I travel everywhere with it, even overseas as I find it's one of the best things to get circulation back into the legs after those nasty long haul flights or long drives. It even works with the cars 12 volt power supply!

This all sounds too good to be true, you have to try it to believe it.
